Rabobank International magazine publishes introductory article on next-generation Internet domain name structure.

Rabobank

[Rabobank](#) International has published a comprehensive article on the history of the Domain Name System and the introduction of corporate TLDs in RaboCom, a biannual Telecom, Media and Internet publication from Rabobank International. Rabobank is the largest retail and SME bank in the Netherlands and is internationally represented in 34 countries.

The article is titled "New Domain Name Structure Allows for Consistent Web Presence", it covers 5 pages and has been published in the RaboCom Spring 2005 issue. The article discusses the next generation Internet and the Public-Root system in great detail.

The article is an initiative of [UNIDT](#) and information was obtained from the following sources:

- The Internet Names Authorization & Information Center (INAIC) <http://inaic.com>
- Internet Assigned Numbers Authority (IANA) <http://iana.org>
- UNified IDentity Technology (UNIDT) <http://unidt.com>
- Public-Root <http://public-root.org>
- Internet Corporation For Assigned Names and Numbers (ICANN) <http://www.icann.org>
- The Internet Governance Project <http://www.internetgovernance.org>

You can view the article at the PDF file below. Adobe Reader is needed to view the file; if you don't have Adobe Reader installed on your computer, you can download it for free: [here](#) .
