Official Public-Root Representative and Lobbyist to the United States Congress and Senate

September 23, 2005

Mr. Marty van Veluw
Managing Director
NBA Services/UNIDT
Haaksbergweg 41
Amsterdam 1101BR
The Netherlands

e-mail: marty.vanveluw@nbaserv.com

Dear Marty:

RE: The Public-Root, UNIDT and Government of Turkey.

As you know, you have a number of contractual obligations outstanding to the Public-Root. It is my understanding from Mr. Burger there was no payment this month. You have 7 days before your time is up. Read your contract. There are also numerous contractual violations between UNIDT and the Public-Root Ltd. I will deal with this later under separate cover.

I want to take the time today to congratulate you on getting George Green out of UNIDT. I am happy with the dismissal or leaving of Marcel Bor and Khadija Bouchiba from UNIDT. It is important that all further involvement of people associated with George Green and the IRA (Irish Republican Army) be discontinued. Well done!

I Strongly recommend in light of such reforms that you have a strong statement ready to present to the Internet community on UNIDT's involvement with George Green. During our last telephone conversation, I found it difficult to accept that you, the Managing Director of UNIDT, had no idea that Khadija Bouchiba was a conduit to Green and that she was in your employ. So, get ready for that one.

It concerns me also that we at the Public-Root are still putting up with Herman Xennt. I understand from Burger that Herman's lawyer wants to make a public statement concerning his involvement with the XTC laboratory at the bunker. I have already advised Burger such a statement would be a complete waste of time. It is better that Herman apologizes for his wrong doings and then disappear.

His collective wrong doings as you are aware including the forgery of Mr. Thornton's resignation email to the INAIC council. Then we have the plagiarism of the ISA web site contents extracted from the ISO

web sites. Herman you will also remember at our meeting refused to see what he had done as fraud preferring instead to label his actions as the "beautification" of a web site.

Then of course there is the embezzlement of funds with Marcel Bor's assistance. There is a lot of damage here to repair. Which to an old salesman like you should only spell opportunities. So, put the pressure on Herman to resign.

Another concern of mine is that the root is still under his control. This means the entire state of turkey is at risk. As you may also be aware the main man in charge of routing at the Public-Root is one Sven Kamphuis who is also know to the local Police and world hackers. Having a known hacker on ones team does cause me and I am sure the state of Turkey some concern. Having control of root data does make for some interesting possibilities including the interception of banking operations. A hacker's paradise you might say.

Again, let me make it clear that Turkish users are surfing the web under the control of root systems operated by people associated with organized crime. That Marty is a bad thing. Put the pressure on.

The opportunities here of course are also too numerous to count. I heard you correctly on the telephone when you told me many reputations are damaged. I know that Marty since I was the one who made it possible for all those people with reputations to get the black eye they deserve. In the end, the only person in the community who stood up and gave you guys the kick in the ass you all deserved was I – the founder of the system you abused. I am very proud of that.

It is for this reason why I feel there are so many opportunities here for you and those who's asses I have collectively kicked by exposing this to the world – as is my duty. Your collective reputations are now shit. Nevertheless, if you stick together and work towards the rebuilding of the Public-Root to community expectations you will be rewarded. If not you will be replaced.

The only other option for you is retirement and that is no option.

Marty, again my congratulations, your on the way to cleaning up your act, the next step is rebuilding to community expectations.

Sincerely and with my luv,

A handwritten signature in black ink, appearing to read "Joe Baptista". The signature is written in a cursive, somewhat messy style with many overlapping strokes.

Joe Baptista
